Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This Office Action is responsive to the applicants' amendment filed on November 12, 2004

Claims 1-10 have been amended. Claims 11-20 have been added. Overall, claims 1-20 are pending in this application.

Applicant's cooperation in correcting the informalities in the drawing and specification are appreciated. However, a few minor informalities contain in claims 11, 14 and abstract.

Drawings

1. The drawings were received on November 12, 2004. These drawings are acceptable.

Specification

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Objections

3. Claims 11-20 are objected to because of the following informalities:

- Claim 11, the word "means" is preceded by the word(s) "an arcuate groove and high pressure supplying hole" in an attempt to use a "means" clause to recite a claim element as a means for performing a specified function. However, since no function is specified by the word(s) preceding "means," it is impossible to determine the

equivalents of the element. See *Ex parte Klumb*, 159 USPQ 694 (Bd. App. 1967).

Appropriate correction is required.

- Claim 14, line 5 "the flat groove" should be changed to --the arcuate groove --.

Appropriate correction is required.

- Claims 12-20 are objected to by virtue of their dependence on claim 11.

Allowable Subject Matter

4. Claims 1-10 are allowed.

Conclusion

This application is in condition for allowance except for the following formal matters as set forth above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
